WORKING PAPER

Viewer: 018 JUNE  
Date : 9 MAY 89  
Target: Beacon Exercise

SUMMARY OF INFORMATION:

1. (S/SK/NF) Beacon was in a bright, long, narrow "aisle"-type of place, which had things up above, and things at about waist level. Many of the "things" above arched downward, and gave the strong AOL of hanging plants. The "things" at waist level were mostly green, and had spots of other bright colors. These appeared to be somewhat unkemptly arranged (not giving the appearance of packaged items arranged in neat rows, but more like items which were of irregular shape and non-uniform size). There was a strong AOL that these, too, might be plants.
2. (S/SK/NF) Dowsing did not give any strong, definite "feel", but finally indicated a location in grid AI on the map. Redowsing indicated another place, but still in the same grid square, and dowsing again, located the beacon in a smaller area within this last dowsed location (see the circle within a circle on the map).
